

BUSINESS BACKS LOW-CARBON USA

One thousand companies and investors have signed the Business Backs Low-Carbon USA statement since November 2016. Companies and investors wishing to add their name to the statement can do so by registering [here](#). For media inquiries, please contact: Peyton Fleming fleming@ceres.org or Melanie Gade melanie.gade@wwfus.org.

Dear President Trump, Members of the US Congress, and Global Leaders:

We, the undersigned members in the business and investor community of the United States, re-affirm our deep commitment to addressing climate change through the implementation of the historic Paris Climate Agreement.

We want the US economy to be energy efficient and powered by low-carbon energy. Cost-effective and innovative solutions can help us achieve these objectives. Failure to build a low-carbon economy puts American prosperity at risk. But the right action now will create jobs and boost US competitiveness. We pledge to do our part, in our own operations and beyond, to realize the Paris Agreement's commitment of a global economy that limits global temperature rise to well below 2 degrees Celsius.

We call on our elected US leaders to strongly support:

1

Continuation of low-carbon policies to allow the US to meet or exceed our promised national commitment and to increase our nation's future ambition

2

Investment in the low carbon economy at home and abroad in order to give financial decision-makers clarity and boost the confidence of investors worldwide

3

Continued US participation in the Paris Agreement, in order to provide the long-term direction needed to keep global temperature rise below 2°C

Implementing the Paris Agreement will enable and encourage businesses and investors to turn the billions of dollars in existing low-carbon investments into the trillions of dollars the world needs to bring clean energy and

prosperity to all.

We support leaders around the world as they seek to implement the Paris Agreement and leverage this historic opportunity to tackle climate change.

LEADING EXECUTIVES ARE CALLING FOR A LOW CARBON USA

“It is vital that the business community demonstrates its ongoing commitment to tackling climate change,” said Barry Parkin, Chief Sustainability and Health and Wellbeing Officer at **Mars Incorporated**. “This is an important moment in global political and economic history, and we absolutely must come together to solve the immense challenges facing the planet. Climate change, water scarcity and deforestation are serious threats to our business and society.”
